#	Question	Answer
1	Does the 11 point font size limit apply to all graphics and tables?	NO
2	What specific projects will be needing survey services in the nest 2 years?	Waterway bathymetry in 2024. Likely other ad-hoc in-water and upland surveys.
3	Will there be hazardous material exposure for the fieldwork? If so, what type of hazardous material environment is anticipated?	Unlikely. The Port would identify any possible harzards prior to commenctment of fieldwork and all parties involved would work under an appropriate Health and Safety Plan.
